WE CONDEMN THE COUP ATTEMPT IN BOLIVIA

For the people of Central and South America, 50 years ago, coup sieges by soldiers trained in the United States and with direct support from the embassies of that country were constant.

Everything suggested that these policies had remained in the past, but they were presented again yesterday in the Republic of Bolivia.

The constitutional charters and all the laws that govern life in republican countries have been written not by workers or retirees, but by the bourgeoisie of each of the countries. However, when something makes them uncomfortable, they violate their own laws and their own version of democracy.

While coups d'état are being plotted in America, in Europe NATO is used for war, or further afield Israel is used for genocide. The objectives are the same, to attack the rights of the people and favor the interests of transnational corporations of all kinds, and to subjugate the will of the nations and peoples who intend to decide their own destiny.

Yesterday's attempted coup d'état in Bolivia is nothing more than the return to the old policies of capitalism and its developed form of imperialism, which is why the International Union of Pensioners and Retirees Unions of the World Federation of Trade Unions (UIS) of P&R of the WFTU) we condemn the failed attempt, we express our solidarity with the Bolivian people and the government chaired by Luis Arce by popular election, and we support the public demonstrations to which their union and popular organizations, of workers and workers, must resort, active and retired, in defense of their rights and interests.
